

# Safety Labels

## New procedure

Valued Customers,

After receiving many comments from our customers asking us to send the safety labels loose to facilitate the preparation work for their installs, we managed to get approval from our liability insurance to proceed as described below.

- 1) Aluminum general warning & serial number plates must be factory installed;
- 2) All other safety & warning labels can now be sent loose with the shipments and it will be the responsibility of all installers to make sure that the proper labels are installed for each corresponding dump body delivered.

Figure 1: S/N & general warning label aluminum plate

Figure 2: Various safety labels (glue on)

General instructions on where and when we suggest to install the various labels are outlined in the User's Manual.

This new procedure is effective on all bodies manufactured as of July 6, 2015.

I would like to take this opportunity to remind you that our offices will be closed for our annual shutdown starting on July 16th at noon. Normal activities will resume on Tuesday August 4<sup>th</sup> 2015.

I wish you all a pleasant summer.

Nathalie St-Pierre  
 General Manager
