- Would you like to play an important role in our maintenance team?
- Do you like challenges that involve special projects, continuous improvement and preventive maintenance?
- You want to participate in the implementation of new state-of-the-art equipment?
- Do you have knowledge of industrial control and automation systems?
- You describe yourself as methodical, proactive, able to work in a team and independently?
- Are you determined to deliver the projects assigned to you efficiently?

If so, then don't hesitate to send us your CV now! *At Beau-Roc, we are definitively THE Company where you will be able to deploy your talent and make a career!*

This is our Company:

For over 40 years, Beau-Roc Inc. has been a world leader in the manufacturing of custom steel and stainless steel dump bodies in North America, producing state-of-the-art designs since our foundation in 1984. Our company is as much about the quality of our employees who are part of our team as it is about the quality of our products: from design to manufacturing to marketing of our vast selection of custom dump body models to suit all fleets and applications that are distributed through our network of partners in Canada, the United States.

This is our Game and We do it well!

Position Summary:

The **Millwright** performs maintenance, installation and improvement work on production equipment to ensure proper operation. In addition, he/she ensures that all the tasks he/she performs are carried out in compliance with health and safety rules, laws and regulations as well as company policies. More specifically, he/she is called upon to:

- Repair, adjust, modify and inspect all our mechanical, electrical, electronic, hydraulic, pneumatic and welding equipment and machines in our facility;
- Perform scheduled inspection and preventive maintenance according to established standards and recommended procedures;
- Troubleshooting, diagnose and carry out repairs to equipment and ensure rapid repairs in the event of equipment breakdowns;
- Collaborate with the maintenance team, specialized contractors and the engineering team on various special projects;
- Participate in the installation and fabrication of new production equipment and other equipment or items required for operations;
- Participate in the development and maintenance of the preventive maintenance program;
- Ensure the validity and certification of the machine park;
- Maintain an inventory of critical spare parts;
- Collaborate with the Health and Safety Committee to implement innovative solutions;
- And all other related responsibilities.

Why work at Beau-Roc Inc.? *Here are some of our perks:*

- To have a four (4) day work schedule, during the day and all your weekends off!
- Industrial Park located only 15 minutes East from downtown Ottawa-Gatineau
- Complete group benefits program, Matched RRSP, bonus system, free on-site parking and more!
- Join a dynamic and professional team that works hard while having fun!
- A work environment that allows people to grow and that promotes the development of its employees;
- Exceptional operational know-how in a safe and friendly working environment;

- Inspiring challenges and a vision for long-term, stable career development.

Profile required:

The candidate must be able to show initiative and prioritize safe work, cooperation, transparency, rigor and respect. Do not hesitate to get involved by proposing concrete solutions while being open to consulting and learning from other employees in order to apply best practices.

Requirements and Skills that we look for:

- 10 years of experience required;
- Has a college diploma (DEC) in Electromechanics or a vocational diploma (DEP) in Electromechanics or Industrial Mechanics or other appropriate training;
- Work experience deemed equivalent may be substituted for education;
- A passion for mechanics and electricity (high voltage 600 volts) and a good command of mechanical repairs and the use of hand and power tools are essential assets;
- Experience in a manufacturing or industrial environment is an asset;
- Knowledge of PLC, CNC, controllers, Plasma/Laser cutting machine, folding bench, welding machine, etc. (*Assets*);
- Analytical skills and ability to make diagnoses;
- Basic computer skills (MS Office and maintenance software);
- Resourcefulness, autonomy and initiative;
- Good knowledge of either French or English, oral and written (*Bilingualism is an asset*);
- Ability to work safely at all times and a good sense of humor are essential!

How to apply:

Candidates interested in joining our team should send their curriculum vitae (Resume) **today** along with a cover letter to our Human Resources team directly on this job posting at hr@beuroc.com
